Profile

Software Engineering student at SMK Telkom Malang (2024–2027), specializing in Backend Development with a focus on building scalable server-side systems and reliable software infrastructure. Currently a scholarship recipient of PT Strategart Business Consulting and Services, awarded in recognition of academic performance and technical potential in software engineering.

Education

SMK Telkom Malang, Malang, East Java, Indonesia

Software Engineering, Backend Development Specialization Jul 2024 - Jun 2027 (expected)

- Awarded a full scholarship by PT Strategart Business Consulting and Services in recognition of strong academic performance and demonstrated technical aptitude within the Software Engineering program, with continued support throughout the course of study
- Specialized in core software engineering principles, backend systems engineering, and database design.
- Achieved Highly Competent status on the official Competency Unit Test (Ujian Unit Kompetensi) administered by Telkom Schools Malang.

Experience & Leadership

SMK Telkom Malang, Malang, East Java, Indonesia

Back End Developer & Scholarship Recipient Jul 2024 - Present

- Engineered backend architectures and RESTful APIs using Node.js and Prisma ORM for database modeling.
- Implemented strict version control workflows and clean coding standards across academic and production projects.
- Developed reliable server-side infrastructure to support high-availability software applications.

Pusat Prestasi Nasional (Puspresnas)

Team Leader Mar 2026 - Jul 2026

- Led a student team through the FIKSI (Festival Inovasi dan Kewirausahaan Siswa Indonesia) Puspresnas 2026 entrepreneurship competition, coordinating project planning, task delegation, and technical execution across the team; guided the group in developing and presenting a combined business and technology concept to competition judges

Freelancing (Simpull)

Founder & Developer Aug 2025 - Jun 2026

- Founded and independently built Simpull, an e-commerce platform, handling both technical development and day-to-day business operations; designed and implemented the platform's backend systems while managing product listings, customer transactions, and ongoing site maintenance
